

*Amendments*

*In the Claims:*

Please amend claim 1 as follows:

---

- 61
1. (Twice Amended) A wiring layer structure connected to a first electrode of a ferroelectric capacitor having first and second electrodes, comprising:
- a main wiring layer including a first material; and
  - a coating layer including a first coating part provided between said main wiring layer and said first electrode, a second coating part provided on the top surface of said main wiring layer, and a third coating part provided on side faces of said main wiring layer;
- wherein said first material reacts with a substance to produce a reducing agent, said substance being infiltrated from the outside to this main wiring layer, and said coating layer is conductive and comprises a second material for preventing the infiltration of said substance into said main wiring layer.
